Experience

MEARN Stack Intern at Luminar TechnoLab , Calicut

July 2024 - Jan 2025

- Designed Innovative Web applications
- Collaborated with other Inters on Group Projects

Software Engineer Intern at XTG Technologies , Cochin

May 2024 - Dec 2024

- Created Telegram bot for trading , Designed backend using Python Flask
- Used Kafka and RabbitMQ for pipelining and microservice integrations.
- Integrated db connections and handling multiple users sessions .
- Mentored multiple interns in kafka and session handling

Web Developer Intern at Amdox Technologies , Bengaluru

Jun 2026 - Aug 2026

- Developed asynchronous workflows using Redis and BullMQ for background processing, notifications, and scheduled tasks.
- Implemented secure coding practices including input validation, rate limiting, OWASP security measures, and audit logging for enterprise-grade
- Containerized applications using Docker and participated in CI/CD automation with GitHub Actions, Kubernetes, and ArgoCD deployment

Projects

Imagify - Text to Image

[\[link\]](#)

- AI based image rendering , RazorPay payment gateway implemented.
- Password Encryption with bcrypt . mongoose ORM , jsonwebtokens implemented in middlewares are used for Authorization.
- Client and Admin login with user authentication.
- Framer motion for smooth animations.

AI Resume & Portfolio Matcher

[\[link\]](#)

- Built an AI resume analyzer with React and Flask using Gemini AI for job matching, scoring, and ATS optimization insights.
- Engineered a scalable full-stack architecture with resume parsing (PyPDF2), JWT-based authentication, bcrypt hashing, and SQLAlchemy ORM (PostgreSQL/SQLite), featuring a responsive React UI with real-time feedback, RESTful APIs, and AI-driven semantic optimization.

Urban Flow - Smart AI Traffic System

[\[link\]](#)

- YOLOv8 and YAMNet for real-time vehicle, siren, and honking detection.
- Engineered an intelligent traffic optimization pipeline using OpenCV, REST APIs, and Machine Learning, enabling automated congestion management and real-time analytics.
- Implemented computer vision and audio event detection pipelines to dynamically adjust traffic signals, reducing congestion and improving emergency response efficiency.

Skills

Language

- Python
- Java
- JavaScript
- C++

Framework

- React
- Angular
- Django
- Flask

Database

- MySQL
- PostgreSQL
- MongoDB

Education

MCA , Jain University

JAIN CS & IT
2025 - 2027

BCA , Kannur University

ITM College of Arts & Science
2021 - 2024

Communication

- English (Fluent)
- Malayalam (Fluent)
- Hindi (Proficient)

Certifications

- _System Administration (Microsoft | LinkedIn)
- Software Development (Microsoft | LinkedIn)
- React Frontend Developer (HackerRank)
- Ordered Data Structures(University of Illinois)
- Deloitte Technology Simulation(Forage)
